Pseudo Random Studios (PRS)

GUARDIANS

USER MANUAL

BRIEF BACKGROUND:

You are the Guardian of Earth's Nexus, which is the lifeforce of your world. Without your lifeforce you and your world will die. As the world's entrusted Guardian, your job is to protect the Nexus from any evil force that attempts to take your world.
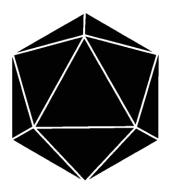

Enter Evil:

The game begins as evil enemies from an unknown world invade earth. As waves of enemies approach, it is your job to fend off the enemies. As the game progresses, the enemies will become stronger, forcing you to begin **searching** the map **far** and **wide** for **bigger** and **badder** weapons.

Enter Later Levels:

After you have defeated the initial waves, you discover the other worlds, and you must travel to them. But this time, instead of defending your precious earth, you will destroy the other Evil world's Nexus'. Once these are destroyed, the war will be won and Earth will be safe.

HOW TO PLAY (SIMPLE PLAYTHROUGH):

- To play game, **click** "**guardians.exe**" file in the guardians_exe folder
  - Note: (Refer to README for installation instructions)
